Our **competent and versatile team** is at your service to design and manufacture custom products that meet your expectations.

We offer an integrated **design and manufacturing** service, including engineering and authentication of plans to reduce the number of stakeholders. Our engineers, drafters, welders-fitters, machinists, and quality inspectors will be able to understand your needs and **transform your ideas into concrete projects**.

Our project managers have several years of experience in the agricultural sector and in packing and processing plants. They will deliver **high-quality turnkey projects**.

Let us assist you in achieving your goals!

Our mission

AFS specializes in metal transformation in the industrial, agricultural and commercial domains, while providing flexibility to clients. Our team is comprised of qualified personnel who manufacture and install in a safe and secure manner:

- **Steel structures**
- **Metalworking**
- **Welded mechanical pieces**
- **Specialized pieces**
- **Conditioning equipment for garden produce.**

Our vision

AFS is recognized for designing, manufacturing and distributing of products and equipment that meet the requirements of clients and contribute to their product's quality and performance.

In order for the company to be a successful organization, we implement best practices in all areas of intervention.

Our customer approach

- Pursuing excellence
- Being trustworthy
- Acting as a partner and maintaining long-term relationships
- Delivering satisfaction
- Meeting deadlines

Health and Safety at AFS

We are committed to providing a healthy and safe work environment to our employees. For this reason, we are members of a prevention mutual and we have a H&S Committee, made up of workers who ensure maintenance and compliance with internal rules.
